A. Time is not the same everywhere. When it is noon in New York, for example, it is still 9 a.m. in San Francisco. The sun seems to move across the sky from east to west as the Earth turns on its axis. As the sun "moves," the hour moves. If every city and town set its clocks by sun time, few places would be on the same time. To establish a regular sequence of time changes around the world, the earth has been divided into 24 standard time zones. All the clocks in a time zone are set at the same time. All those in the time zone to the east are one hour later. You can win a World Almanac if your question is selected. Send your name and age to JOHNNY WONDER, c/o this newspaper, P.O. Box 1335, (DA) Santa Cruz, CA 95061.
